

Workshop Texture Strips Materials

Use the Amazon list if you live in Europe:

https://www.amazon.de/hz/wishlist/ls/6TVEOH905U43?ref_=wl_share

Materials you need:

- **Texture**

Super Finish Filler (Polymer) – This is the equivalent of texture paste. It's fine-grained and perfect for creative work. I use it because, when working with texture often, texture paste from art supply stores can get expensive. This paste is made of the same material (acrylic) but is better suited for fine lines and high-relief textures.

Texture paste from art stores is often too runny and doesn't hold volume well.

What I use:

If you're from America or Canada, **Sheetrock All Purpose Joint Compound** is a great alternative. Since this paste can be quite thick, I recommend mixing in a bit of white acrylic paint and a small amount of carpenter's glue for better consistency and adhesion to canvas.

- **Pastry bags or vegetable freezer bags, or food bag**

- Any sheets of A4 paper
- Plastic cups for water
- Medium-sized flat brush
- Cloth or paper towel for cleaning
- Spatula
